

Fraction Decomp Study Problems

Date _____ Period _____

Find the partial fraction decomposition of each. #'s 1-4 have 2 distinct linear factors. #'s 5-6 have 3 distinct linear factors. #'s 7-8 have 1 pair of repeated factors (perfect squares). #'s 9-10 have 1 distinct linear factor and 1 pair of repeated factors. #'s 11-12 require long division. #'s 13-16 have one linear factor and one non-factorable quadratic factor (requires the constant A and the linear term Ax + B).
