Calculus Distance Learning Plan

Office Hours –  AB Calculus, 9am-10am every day
BC Calculus, 10am-11am every day (although BCers may attend AB for extra practice)

These will be conducted on Zoom. A meeting invite will be sent every morning with a link to the meeting and a code in case the link doesn’t work for you. These meetings will begin with all students muted, and Mr. G will go through the procedures for how questions will be asked and discussions be conducted. Students will be on audio only, but Mr. will activate video if a student wants to demonstrate work they have done. Since our calculus classes involve our more mature students, these rules may be relaxed and we may do more open meetings.

Tutoring – from 12:30pm until the end of the day Mr. G will be available on remind to answer quick questions. An individual student or group of students can also schedule a tutoring session on Zoom during this time period. These sessions will be full audio and video if students desire (as long as the group isn’t too large).

Remaining Material – AB students will complete the differentials unit available on Mr. G’s website. Once a student has completed all of the google classroom quizzes, they will have the option to take the summative exam, which will consist of a project-style FRQ which will be scored using a rubric. Once the FRQ has been scored, the student will be able to rework any incorrect portions as many times as they want until they receive a score of 100.

Additional Grades – Other summative grades will come from working mini-practice exams, with the option to rework until a score of 100 is reached.

Quarter 3 Retakes and/or Missing Assessments – The 3rd quarter grading period ends this Wednesday, April 1st. It is unlikely anything from quarter 3 can be reassessed by then; however, ANY exams may be reassessed at any time during the remainder of the year, at which time, your 3rd quarter grade will be immediately changed. These will be project-style FRQ assessments similar to your differentials assessment.

AP Exam – your exams will be on-line 45-minute FRQs. At the moment, we do not have specific dates, but we will know more by April 3rd or 4th.

Resources – Mr. Gussaroff’s website – www.mrgussaroffmath.weebly.com

All content will be available on Mr. G’s website, but can be delivered by other means as needed.

NMSI practice packets for each skill are available to be delivered via remind or e-mail but, for legal reasons, cannot be uploaded to Mr. G’s website. All packets (for AB and BC) are also available on a google drive that can be accessed using the following link: https://drive.google.com/open?id=1S4_CgDbTwoE5Jibexx9fobzar6ktTod

Study Sessions – I will be available every afternoon to work with anyone on any and all material, but I plan to do one study session a week as well covering each major topic. My hope is to do these Saturday mornings, but I will wait to confirm until we see how the first week of distance learning goes.

NOTE – Those who do not wish to take the exam can have their exams cancelled for free. I do not wish most of us to avail ourselves of this option, but if you are certain that you cannot put in the time to review, let me know and we will discuss.
